Intelligent room operation with SAUTER ecoUnit-Touch

This room operating unit from SAUTER combines elegant design with intuitive operation – on the panel or via a smartphone app.

With the SAUTER ecoUnit-Touch, the room automation can be rapidly adjusted to changing situations and individual requirements. Setpoints for room climate, lighting or sunshade can be set with the touch of a finger. The display uses tiles to enable easy grouping and assignment of functions, and you can slide from one to the other. Operation is performed directly on the device or via Bluetooth with a smartphone app.

+ Elegant design in white or black

+ Intuitive user navigation

+ Scratch-proof touchscreen

+ Integrated temperature sensor

+ Functions can be customised

+ Six digital inputs for integrating conventional light switches or presence sensors

+ Parallel operation via Bluetooth with a smartphone

+ Identical look and feel with app and room operating unit

+ App available for iOS and Android

SAUTER

Creating Sustainable Environments.

With its clear design and simple icon language, the room operating unit integrates perfectly into modern rooms. With its modular structure, the functions of the SAUTER ecoUnit-Touch can be flexibly adapted to a range of room types and usage patterns. Along with an integrated temperature sensor, the SAUTER ecoUnit-Touch has six digital inputs for adding conventional light switches and presence sensors.

Forming part of an intelligent room automation solution, the SAUTER ecoUnit-Touch room operating unit always provides an individualised room climate.

When combined with the ecos 5 room automation stations from the fully BACnet/IP-compatible SAUTER EY-modulo 5 system family, it enables state-of-the-art room automation solutions to be implemented, fulfilling individual requirements and guaranteeing efficient operation at all times.

Example of use

| 1 | Operating device | 3 | Multi-sensor | 5 | Window blinds |
| 2 | Lighting | 4 | Heating/cooling | 6 | Ventilation |
